The term Maintenance of a building refers to the work done for keeping an existing building in

# File Type PDF Foundation Engineering Pc Varghese

a condition where it can perform its intended functions. Usually, the buildings last only for 40 to 50 years in a good shape just because of regular inspection and maintenance that enable timely identification of deteriorated elements. Overlooked dilapidation,

# File Type PDF Foundation Engineering Pc Varghese

inadequate maintenance and lack of repair works may lead to limited life span of a building. This comprehensive book, striving to focus on the maintenance, repair & rehabilitation and minor works of a building, presents useful guidelines that acquaint the readers with the

# File Type PDF Foundation Engineering Pc Varghese

traditional as well as modern techniques for upkeeping and repairing of buildings already constructed. Dexterously organised into five parts, this book in Part I deals with the maintenance of buildings. Description of the construction

chemicals, concrete repair  
chemicals, special materials used  
for repair, and repair of various  
parts of a building is given in Part  
II. Strengthening of reinforced  
concrete members by shoring,  
underpinning, plate bonding, RC  
jacketing and FRP methods are
